Datasym POS Inc. Releases the EliXR Duo

Brantford ON, November 1, 2011- Datasym POS Inc. releases the EliXR Duo. The EliXR Duo has been released to satisfy the need for sophistication and to accommodate the limited space requirements of the standard retail environment.

The EliXR Duo is Datasym's compact Touch Screen system developed specifically for retailers with limited space requirements that require a sophisticated Point of Sale system. While the CPU and Touch Screen are combined into one unit this system still allows for retailer customization by pairing the terminal with a selection of Datasym's peripherals. Similar to the other EliXR series terminals the EliXR Duo operates using the long standing and reputable Datasym PRO software. Upgrading to the EliXR Duo from an older Datasym terminal is both simple and cost effective as the retailer can operate the same back end system internally.

Datasym POS Inc. is a leading edge Point of Sale company based in Brantford, ON Canada with distribution facilities in Niagara Falls, NY. Datasym develops hardware and software solutions for small to large companies across a multitude of industries.
