Datasym Pos Inc. Launches the EliXR Mini

Brantford ON, November 15 2011 - Datasym POS Inc. launches the EliXR Mini, a Linux based POS system. The EliXR Mini offers the same high level of functionality as the other EliXR Series terminals while maintaining a small footprint.

The EliXR Mini is an embedded PC based system developed specifically for POS applications where compact design and processing speed is a requirement. It is also compatible with a variety of peripheral interfaces and operates using the long standing and reliable Datasym Pro Software.

“The EliXR Mini is the optimal solution for customers with restrictive space requirement who cannot afford to sacrifice system functionality. The EliXR Mini is a compact and highly functional Linux based terminal. For existing Datasym customers the training time required to learn this system is minimal as it operates using Datasym Pro Software.”, said Robert Field, President of Datasym Pos Inc.

The EliXR Mini combines a variety of advanced performance features including: embedded hardware, compatibility with high speed thermal printers as well as compatibility with industry standard VGA Displays and comes equipped with both a touch screen and keyboard.

Datasym POS Inc. is a leading edge Point of Sales company based in Brantford, ON. Canada with distribution facilities in Niagara Falls, NY, USA. Datasym develops hardware and software solutions for small to large companies across a multitude of industries.
