Datasym POS Inc. Releases ID Scanning For Age Verification Software

Brantford, ON - Datasym POS Inc. releases the newest software feature for Datasym POS Terminals. ID Scanning for Age verification is now available by using Datasym Terminals in conjunction with Datalogic Gryphon series scanners.

The Gryphon Line of Scanners from Datalogic have the ability to parse and format birthdate information by scanning drivers licences. The Gryphon scanners are imaging scanners available in both 1D and 2D models.

In order for the information to be received and formatted by the scanners, the State must comply with the standards set out by the American Associate for Motor Vehicles Administration (AAMVA). Some of the States that have adopted the PDF417 may still have older style driver's license in circulation.

Datasym POS Inc. is a leading edge Point of Sale company based in Brantford, ON Canada with distribution facilities in Niagara Falls, NY. Datasym develops hardware and software solutions for small to large companies across a multitude of industries.

For more information contact sales at 1-877-512-9954 or e-mail sales@datasym.com.
