**Datasym Pos Inc. Releases the XR651**

---

Brantford ON, September 15 2011 - Datasym POS Inc. releases the XR651, Datasym's newest Hybrid Point of Sale System. While the XR651's external aesthetics remain consistent with XR650 the internal enhancements take this machine to a new level.

Datasym has modernized the internal components of the XR651 to ensure the ease of manufacturing and component accessibility along with improving the product quality and the processing speed of the terminal. A number of electronic components in the XR651 have been upgraded since its predecessor the XR650. Cherry Key Switches have replaced the prior keyboard switch used in the XR650 model. Datasym's XR651 provides retailers with a higher level of connectivity through the addition of a fourth serial port. This terminal continues to operate using Datasym Pro Software and the transition from the XR650 is seamless.

Datasym POS Inc. is a leading edge Point of Sales company based in Brantford, ON. Canada with distribution facilities in Niagara Falls, NY, USA. Datasym develops hardware and software solutions for small to large companies across a multitude of industries.
